### Expectations and Goals

This course prepares the learner over a course of 2 weeks to pass the Cisco Certified CyberOps Associate Exam. Access for up to 6 months to all the online content allow individuals that need to continue to review the material ample time to prepare for the certification exam. This course will prepare students to perform the following tasks:

- Install virtual machines to create a safe environment for implementing and analyzing cybersecurity threat events.
- Explain the role of the Cybersecurity Operations Analyst in the enterprise.
- Explain the Windows OS features and characteristics needed to support cybersecurity analyses.
- Explain the features and characteristics of the Linux Operating System.
- Analyze the operation of network protocols and services.
- Explain the operation of the network infrastructure.
- Classify the various types of network attacks.
- Use network monitoring tools to identify attacks against network protocols and services.
- Use various methods to prevent malicious access to computer networks, hosts, and data.
- Explain the impacts of cryptography on network security monitoring.
- Explain how to investigate endpoint vulnerabilities and attacks.
- Evaluate network security alerts.
- Analyze network intrusion data to identify compromised hosts and vulnerabilities.
- Apply incident response models to manage network security incidents.

## **Course Schedule**

### **Online/Recorded Lecture and Labs/activities**

**Chapter 1:** Cybersecurity and the Security Operations Center

**Chapter 2:** Windows Operating System

**Chapter 3:** Linux Overview

**Chapter 4:** Network Protocols and Services

**Chapter 5:** Network Infrastructure

**Chapter 6:** Principles of Network Security

**Chapter 7:** Network Attacks

### **On-site/In-person Training conducted at Georgia Cyber Center**

**Day 5:** Online Content Review

Chapter 8: Protecting the Network

**Day 6:** Chapter 9: Cryptography and Public Key Infrastructure

**Day 7:** Chapter 11: Security Monitoring

**Day 8:** Chapter 12: Intrusion Data Analysis

**Day 9:** Chapter 10: Endpoint Security and Analysis (lecture) (first half)

**Day 10:** Chapter 10: Endpoint Security and Analysis (lecture) (last half)

Chapter 13: Incident Response and Handling

Skills Based Assessment/Online Final
