This course prepares the learner over a course of 5 weeks to pass the CompTIA Security+ Exam. The success of a student depends on two factors: effort and resources. We are here to provide all the resources needed, along with instruction and coaching. We encourage students to use the all time they need during the 6 months of online access to allow individuals ample time to prepare for the certification exam. We are here to see your succeed.

- **THREATS, ATTACKS & VULNERABILITIES**

Detect various types of compromise and have an understanding of penetration testing and vulnerability scanning concepts

- **TECHNOLOGIES & TOOLS**

Install, configure, and deploy network components while assessing and troubleshooting issues to support organizational security

- **ARCHITECTURE & DESIGN**

Implement secure network architecture concepts and systems design

- **IDENTITY & ACCESS MANAGEMENT**

Install and configure identity and access services, as well as management controls

- **RISK MANAGEMENT**

Implement and summarize risk management best practices and the business impact

- **CRYPTOGRAPHY & PKI**

Install and configure wireless security settings and implement public key infrastructure
