This course prepares the learner over a course of 2 weeks to challenge the Cisco Certified CyberOps Associate exam. The success of a student depends on two factors: effort and resources. We are here to provide all the resources needed, along with instruction and coaching. We encourage students to use the all time they need to prepare for the certification exam. Online resources will be available for up to 6 months after the live/online portion has concluded. We are here to see you succeed.

- Weekly topics/schedules for in-person days may shift slightly if more/less time is needed to adequately cover material.
- **The WebEx room will be open from 1-4pm during scheduled weekly sessions.**
- **Link for WebEx Room will be released to registered students**
